

Engaging with the principles of the Researcher Development Concordat

Background

The Concordat to Support the Career Development of Researchers (Researcher Development Concordat), is an agreement between stakeholders to improve the employment and support for researchers and researcher careers in higher education in the UK. The original Researcher Development Concordat was published in 2008 and was revised in September 2019¹. It sets out three clear principles of **environment and culture**, **employment**, and **professional and career development**. The principles are underpinned by obligations for the four key stakeholder groups, funders, institutions, researchers and managers of researchers, to realise the aims of the Concordat.

There is a pressing need to develop a dynamic, diverse and inclusive system of research and innovation in the UK that is an integral part of society, giving everyone the opportunity to participate and to benefit. UK Research and Innovation (UKRI) expects the research organisations, including universities, in which it invests, to recognise and value their researchers and nurture them in reaching their full potential through the Concordat to Support the Career Development of Researchers. To address this issue, UKRI has published an action plan² and will work with other funders and research employers in creating a common response to the Researcher Development Concordat. UKRI will provide advice on implementing the Concordat principles through its grant terms and conditions and stakeholder engagement activities. It is likely that other funders will follow and require University signatory of the Researcher Development Concordat.

Abertay University is a signatory of the Researcher Development Concordat (December 2020); and will engage with the principles of the revised Researcher Development Concordat and UKRI recommendations, to improve the way in which researcher development can be developed and embedded within the Abertay research culture.

The Researcher Development Concordat has three defining Principles:

- **Environment and culture:** *Excellent research requires a supportive and inclusive research culture. Healthy working environments attract and develop a more diverse workforce, impact positively on individual and institutional performance, and enhance staff engagement.*
- **Employment:** *Researchers are recruited, employed and managed under conditions that recognise and value their contributions. Provision of good employment conditions for researchers has positive impacts on researcher wellbeing, the attractiveness of research careers, and research excellence.*

- **Professional and Career Development:** *Professional and career development are integral to enabling researchers to develop their full potential. Researchers must be equipped and supported to be adaptable and flexible in an increasingly diverse global research environment and employment market.*

In signing up to the Researcher Development Concordat, the head of the organisation (the University Principal) is publicly committing to implement the Concordat Principles, and the organisation is committing to the following responsibilities:

1. Raise the visibility of the Concordat and champion its principles within their organisation at all levels.
2. Identify a senior manager champion and associated group* with relevant representation from across the organisation with responsibility for annual review and reporting on progress.
3. For organisations employing researchers, ensure that they are formally represented in developing and monitoring organisational efforts to implement the Concordat Principles.
4. Undertake a gap analysis to compare their policies and practice against the Concordat Principles.
5. Draw up and publish an action plan within a year of signing up to the Concordat.
6. Set up processes for systematically and regularly gathering the views of the researchers they fund or employ, to inform and improve the organisation's approach to and progress on implementing the Concordat.
7. Produce an annual report to their governing body or equivalent authority, which includes their strategic objectives, measures of success, implementation plan and progress, which is subsequently publicly available.

*The Dean of Research and the Graduate School (N White) is the nominated champion, and the associated group with relevant representation from across the organisation, is composed of the Head of Researcher Development (A Elliott), academic staff (A. Spiers), early career researchers (S. Samuel & S. Kavianpour), and People Services (C. Hodgson & C. Boland).

a) Researcher Development Concordat Action Plan 2020-25

For each of the Concordat Principles, key responsibilities are outlined (see table below) for the main stakeholder groups; researchers, managers of researchers, institutions (and funders). These responsibilities are cast as obligations. Some of these obligations will take time to implement, while some may need to be adapted or might not be appropriate for Abertay. The senior manager champion and associated group have considered each key responsibility to identify where we are already compliant and where we will need additional work to meet each of the principles. This has involved a gap analysis of policies and practices against the Concordat Principles. The summary action plan below sets out our new key priorities for addressing how we will improve our engagement with the aims of the Concordat. The action plan applies to all those engaged with research at Abertay.
