

## Why choose Abertay? Hear it from our Biomedical Science Alumni...

“The degree is delivered by a combination of academics and healthcare professionals, and because of this you get the best of both worlds. They also advice about the relevant professional and regulatory bodies and legislation which is really helpful. Abertay has a real family feel to it. The lecturers knew every student by name and they genuinely cared about students reaching their potential.”

Nicola Robson

Specialist Biomedical Scientist  
Pathology Department, NHS Tayside  
BSc (Hons) Applied Biomedical Science (2016)

“There is a great emphasis on self-directed learning and this helped me a lot when I was learning in my initial training period and even now. I feel Abertay helped me to embrace working life with ease.”

Derek Mitchell

Paramedic  
Scottish Ambulance Service  
BSc Biomedical Science (2016)

“Registration is available straight after you’ve completed the course, which gives you the opportunity to become a registered Biomedical Scientist straight away. In my opinion, the unique modular structure of the Biomedical Science course prepares students to be ready, to apply for jobs and to conduct a successful interview after finishing your studies.”

Olga Smith

Biomedical Scientist  
Blood Transfusion Laboratory, National Services Scotland  
BSc (Hons) Applied Biomedical Science (2017)
