

## Why choose Abertay? Hear it from our Civil Engineering Alumni...

“I chose Abertay because I could start in second year, giving me credit for Open University maths and engineering modules I had completed. The placement in 3<sup>rd</sup> year led to a full-time job straight after my graduation, where I worked as a site engineer for a construction contractor for about 18 months. This gave me the experience to get to where I am now.”

Mark Webster

Project Manager

Sensum Group

BSc (Hons) Civil Engineering (2018)

“The input and support I received from the engineering staff was crucial. Without it, I would have found the course a lot more difficult.”

Ailsa Howie

Civil Engineering Lecturer

Dundee and Angus College

BSc (Hons) Civil Engineering (2019)

“Abertay’s Civil Engineering Course is fantastic. It was an intensive four years that covered a broad spectrum of subjects. The placement in industry was one of the most important things. To be given the opportunity to go into the real world – so to speak – and put the skills you learned in class into practise really shows you how your learning can shape the world.”

Graham Lawson

Senior Engineer

Persimmon Homes

BSc (Hons) Civil Engineering (2013)
